

IT/CYBER DEFENSE APPRENTICESHIP

EMPLOYER BENEFITS

Employer partners looking to hire entry-level IT Help Desk staff or upskill their current workforce with high demand IT skills, can use this apprenticeship to help with recruiting and increase retention.

TalentGro provides access to several grant awards that can offset some of the associated training costs.

HOW THE APPRENTICESHIP WORKS

In collaboration with Google and Jobs For The Future, Motlow State is offering the Google IT Support Specialist course free of charge for 20 qualified applicants.

Motlow State is building a pathway for students who successfully complete this certificate to earn prior learning credit so that they may benefit academically if they choose to enroll into Motlow State's 2-year AAS, Cyber Defense program.

TalentGro will assist Motlow State by creating a registered apprenticeship for an IT Support Specialist that incorporates the Google Certificate and Motlow State's Cyber Defense program curriculum.
